

EAC 2025

European Ammonia
Conference

The first ammonia
conference designed for
professionals within the:

- steel industry
- transportation industry
- energy industry
- ammonia production industry
- cracking technology industry

CALL FOR PAPERS

14 – 16 OCTOBER 2025
DÜSSELDORF, GERMANY

European Ammonia Conference

The general aim of this “European Ammonia 2025 Conference” is to provide experts with a forum during which all important aspects of Ammonia production and its utilisation are discussed. The conference will bring together professionals from producers, plant suppliers, user companies, research institutes, and universities to foster knowledge exchange and collaboration. The EAC will allow you to discover how especially green ammonia gets of utmost importance as hydrogen carrier for a green steel industry or for its use as fuel in diesel engines to achieve carbon neutrality. Because due to its high energy density, which is about 50% higher than liquid hydrogen by volume, ammonia is much easier to transport compared to hydrogen.

Topics

- Worldwide production and utilisation of Ammonia
- Production and cracking technologies for Ammonia
- Electrolyser technologies
- Experiences from Ammonia plant operators
- Transport, handling and storage of Ammonia compared to Hydrogen
- Safety aspects
- Utilisation of Ammonia in the steel industry
- Utilisation of Ammonia as fuel for engines and motors
- Infrastructure for Ammonia
- Environmental and regulatory aspects

CALL FOR PAPERS

EAC 2025

Submission of papers:

All paper proposals must be submitted online. Please visit: www.eac2025.com and go to the Call for Papers section. There you will find an easy-to-use online submission form. Your abstract can be a maximum of 300 words. Please note that papers will only be accepted online.

Language:

The conference language is English

Deadline:

Please submit your abstracts by **28 February 2025**. All abstracts will then be rated by a Scientific Programme Committee (SPC). In the case of too many submissions, abstracts of equal quality will be accepted on a first come, first serve basis.

www.eac2025.com

Important dates:

28 February 2025	Abstract submission deadline
Mach 2025	The Scientific Program Committee will evaluate the submitted abstracts.
April 2025	Paper submitters will be informed about the Scientific Program Committee's decision. Delivery of author guidelines.
September 2025	Full paper submission deadline.
14 – 16 October 2025	European Ammonia Conference

Venue:

Maritim Hotel
Düsseldorf
Maritim-Platz 1
40474 Düsseldorf

Compliance rules:

All cooperating organisations are committed to adhering strictly to all applicable antitrust laws. Within the context of the EAC 2025 it is strictly prohibited to discuss competitively sensitive subjects such as price-fixing agreements or agreements on quantities.
